

## JLG Telehandler

JLG Telehandler Training Saskatoon - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Freshly retired, after spending several years working with his brother to build their crane business into an industry leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road expedition.

While on their journey, John spent time talking to former business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic incident-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered an infinite market for a product that could swiftly and securely lift individuals in the air to accomplish upkeep and other construction functions.

After returning from their holiday, John set up a partnership with two of his friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into current models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fateful cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has extended itself into a number of global marketplaces and continues to cultivate new machines to guarantee that clients are able to become safer and more resourceful within their workplace.
