

Toyota Forklift

Toyota Forklift Training Saskatoon - In the U.S., Toyota Materials Handling inc., or TMHU, has been the top selling lift truck supplier since 1992. Proudly celebrating more than 40 years of operations, the Irvine, California based business provides a comprehensive line of quality lift vehicles. Attributable to their history of excellence, reliability, and sturdiness, Toyota remains popular in this aggressive market. Quality is the foundation of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are built here.

All Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. TIEM has been honored many times for its dedication to continuous progress, and its environmental systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift vehicles emit 70 percent fewer smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

Brett Wood, President of TMHU, links Toyota's success to its stout commitment to fabricating the best quality lift vehicles at the same time as delivering the utmost client service and support. "We must be able to learn and predict the needs of our customers," Â• said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." Â• TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's principal lift truck dealer and is amongst the magazines prestigious world's Most Admired Companies.

New Meaning to Environmental Responsibility

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not a lot of other companies and no other lift truck maker can match Toyota's record of protecting the natural environment while concurrently advancing the economy. Environmental responsibility is an important characteristic of corporate decision making at Toyota and they are proud to be the first and only producer to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet another reason they remain a leader within the industry.

In 2006, Toyota released the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission principles, and also meets California's more involved 2010 emission standards. The end creation is a lift vehicle that produces 70% less smog forming emissions than the present Federal standards allow.

Moreover in 2006, Toyota established an affiliation with the Arbor Day Foundation, furthering their commitment to the environment. Greater than 57,000 trees have been planted in regional parks and national forests damaged by environmental reasons such as fires, as a product of this relationship. 10,500 seedlings have also been spread through Toyota Industrial Equipment's network of dealers to non-profit organizations and local customers to help sustain communities all over the United States

Industry-Leading Safety

Toyota's lift trucks offer better durability, visibility, efficiency, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS", helps decrease the risk of incidents and injuries, in addition to increasing productivity levels while minimizing the likelihood of product and equipment damage.

System Active Stability is able to discern situations that may lead to lateral volatility and likely lateral overturn. When any of these factors have been sensed, the SAS will instantaneously engage the Swing Lock Cylinder to re-stabilize the rear axle. This changes the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the likelihood of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also aids to avoid injuries or accidents while adding durability.

The SAS systems were originally adopted on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped drive Toyota into the lead for industry safety standards. Now, SAS is adopted on nearly every new internal combustion models and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with required worker instruction, overturn fatalities across all models have decreased by 13.6% since 1999. Additionally, there have been an overall 35.5% reduction in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's uncompromising principles reach far beyond the technology itself. The company believes in offering widespread Operator Safety Training courses to help customers satisfy and exceed OSHA standard 1910.178. Instruction courses, videos and various materials, covering a wide scope of matters-from personal safety, to OSHA regulations, to surface and cargo conditions, are offered through the dealer network.

Toyota's Commitment to The U.S.A.

Toyota has maintained a continuous presence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift vehicle. This fact is demonstrated by the statistic that 99% of Toyota lift trucks sold in America at the moment are manufactured in the United States.

Situated in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126 acres. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service parts, with the total investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and consumers of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an area for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a education center.

First in Client Satisfaction and Service

TMHU has 68 sanctioned industrial equipment dealers, along with 189 dealership locations all through the United States, providing the most comprehensive and inclusive consumer support and customer service in the industry. The company's new and Certified Used lift trucks, service, components, and financing capabilities make Toyota dealerships a one-stop shop to ensure overall client satisfaction.
