

Saskatoon Aerial Lift Train the Trainer

Saskatoon Aerial Lift Train the Trainer - The Aerial Lifts Train the Trainer Certification Program would teach trainers how to effectively train operators in safe industrial mobile machinery operation. Trainers are provided with in-depth instruction on aerial lift equipment. The program is provided on an open enrollment basis and delivered at selected training sites. Before the certification, trainers are assessed and scored on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the top training provider in the industry, we provide top notch hands-on training. We offer lots of chances to practice the concepts and techniques that are learned inside the classroom. In addition to hands-on experience, trainers develop general understanding of equipment theory and instructional techniques, classroom and field communication skills, and ability to successfully train and assess operators. Trainers will gain an understanding of what traits make an effective trainer.

The Aerial Lift Train the Trainer Certification Program teaches the instructional techniques involved in communicating concepts inside a classroom and/or field condition. Knowledge requires a training part to be efficient in workplace conditions. There are three aspects of machine operation which the trainer should learn how to convey to operators: what to perform; how to do it; and why it has to be carried out.

In the program, trainers would be provided with the detailed, latest reference material to better help them convey the information to equipment operators. The instruction manuals used, contain detailed information about all aspects of industrial mobile machine operator training. Included within the package are training aids that provide a visual reference in order to improve the learning experience. The equipment-specific training products include essential materials for both the trainer and the operator: videos/DVD's, overhead transparencies, kinds of equipment, safety message posters; digital training aids and stability pyramid.
